

Event period: July – September 2024

Location: France

Graphics Playback Operator

The Graphics Playback Operator will play a pivotal role in operating our Vision Playback System (PV4). Collaborating closely with the Sport Presentation Venue Manager, they will play back all vision content, including graphics, VTs and integrated data visuals, across multiple LED surfaces for each event session. Sufficient training will be provided to ensure proficiency in using the PV4 system .

Responsibilities:

- Operate the video playback system proficiently, transmitting video packages and graphics to the video desk console for display on the videoboard.
- Utilise the PV4 software to sequence vision content according to the Sport Presentation Cuesheet, in alignment with the Sport Presentation Manager's directives.
- Collaborate with the Sport Presentation Venue Manager to review event cue sheets to understand your responsibility for each session.
- Assist in downloading, integrating, and testing content (with updates throughout competition), working in tandem with the Sport Presentation Venue Manager.
- Receive cues in English from the Sport Presentation Venue Manager and execute them promptly and accurately.
- Provide support to the Video Desk Operator as needed to ensure smooth operation.

Qualifications/Attributes:

- Demonstrated proficiency in Video Production studies.
- English speaking proficiency required
- Ability to confidently select and deploy appropriate vision content as directed by the Sport Presentation Venue Manager.
- Strong computer skills, including proficiency in relevant software.
- Exceptional attention to detail.
- Proactive and positive 'can-do' attitude.
- Capacity to remain composed and effective under pressure.
- Commitment to adhering to policies and procedures.
- Demonstrated ability to follow clear instructions with precision.
